### DIMSPORT SOLUTIONS FOR THIS VEHICLE

#### RAPID BIKE EASY

Equipped with a microprocessor managing directly the lambda sensor signal to optimize the air/fuel ratio, improve the engine efficiency and eliminate the torque and power gaps

#### RAPID BIKE EVO

It puts in your hands total control of fueling operations as it is directly connected to all stock injectors (up to eight) while managing at the same time the corresponding air/fuel ratio. In this way the carburetion values can be modified throughout the entire engine power delivery curve.

#### RAPID BIKE RACING

It represents the highest level of technology available for reaching top performance, offering the widest range of solutions for demanding professional track riders and street users.

#### YOUTUNE

A compact and innovative calibration device allowing to customize your bike's performance in real time, whether you are on the street or on a race track.

#### SHIFT ASSIST

Performing up-shift as well as down-shift operations

#### **BLUE BIKE**

The valuable contribution of Rapid Bike technology enhancing bike's performance comes to life with Bluebike adapter.

## **MY TUNING BIKE**

Performing a real-time injection auto-remapping
